Behind the change. Beyond the challenge.

Who we are

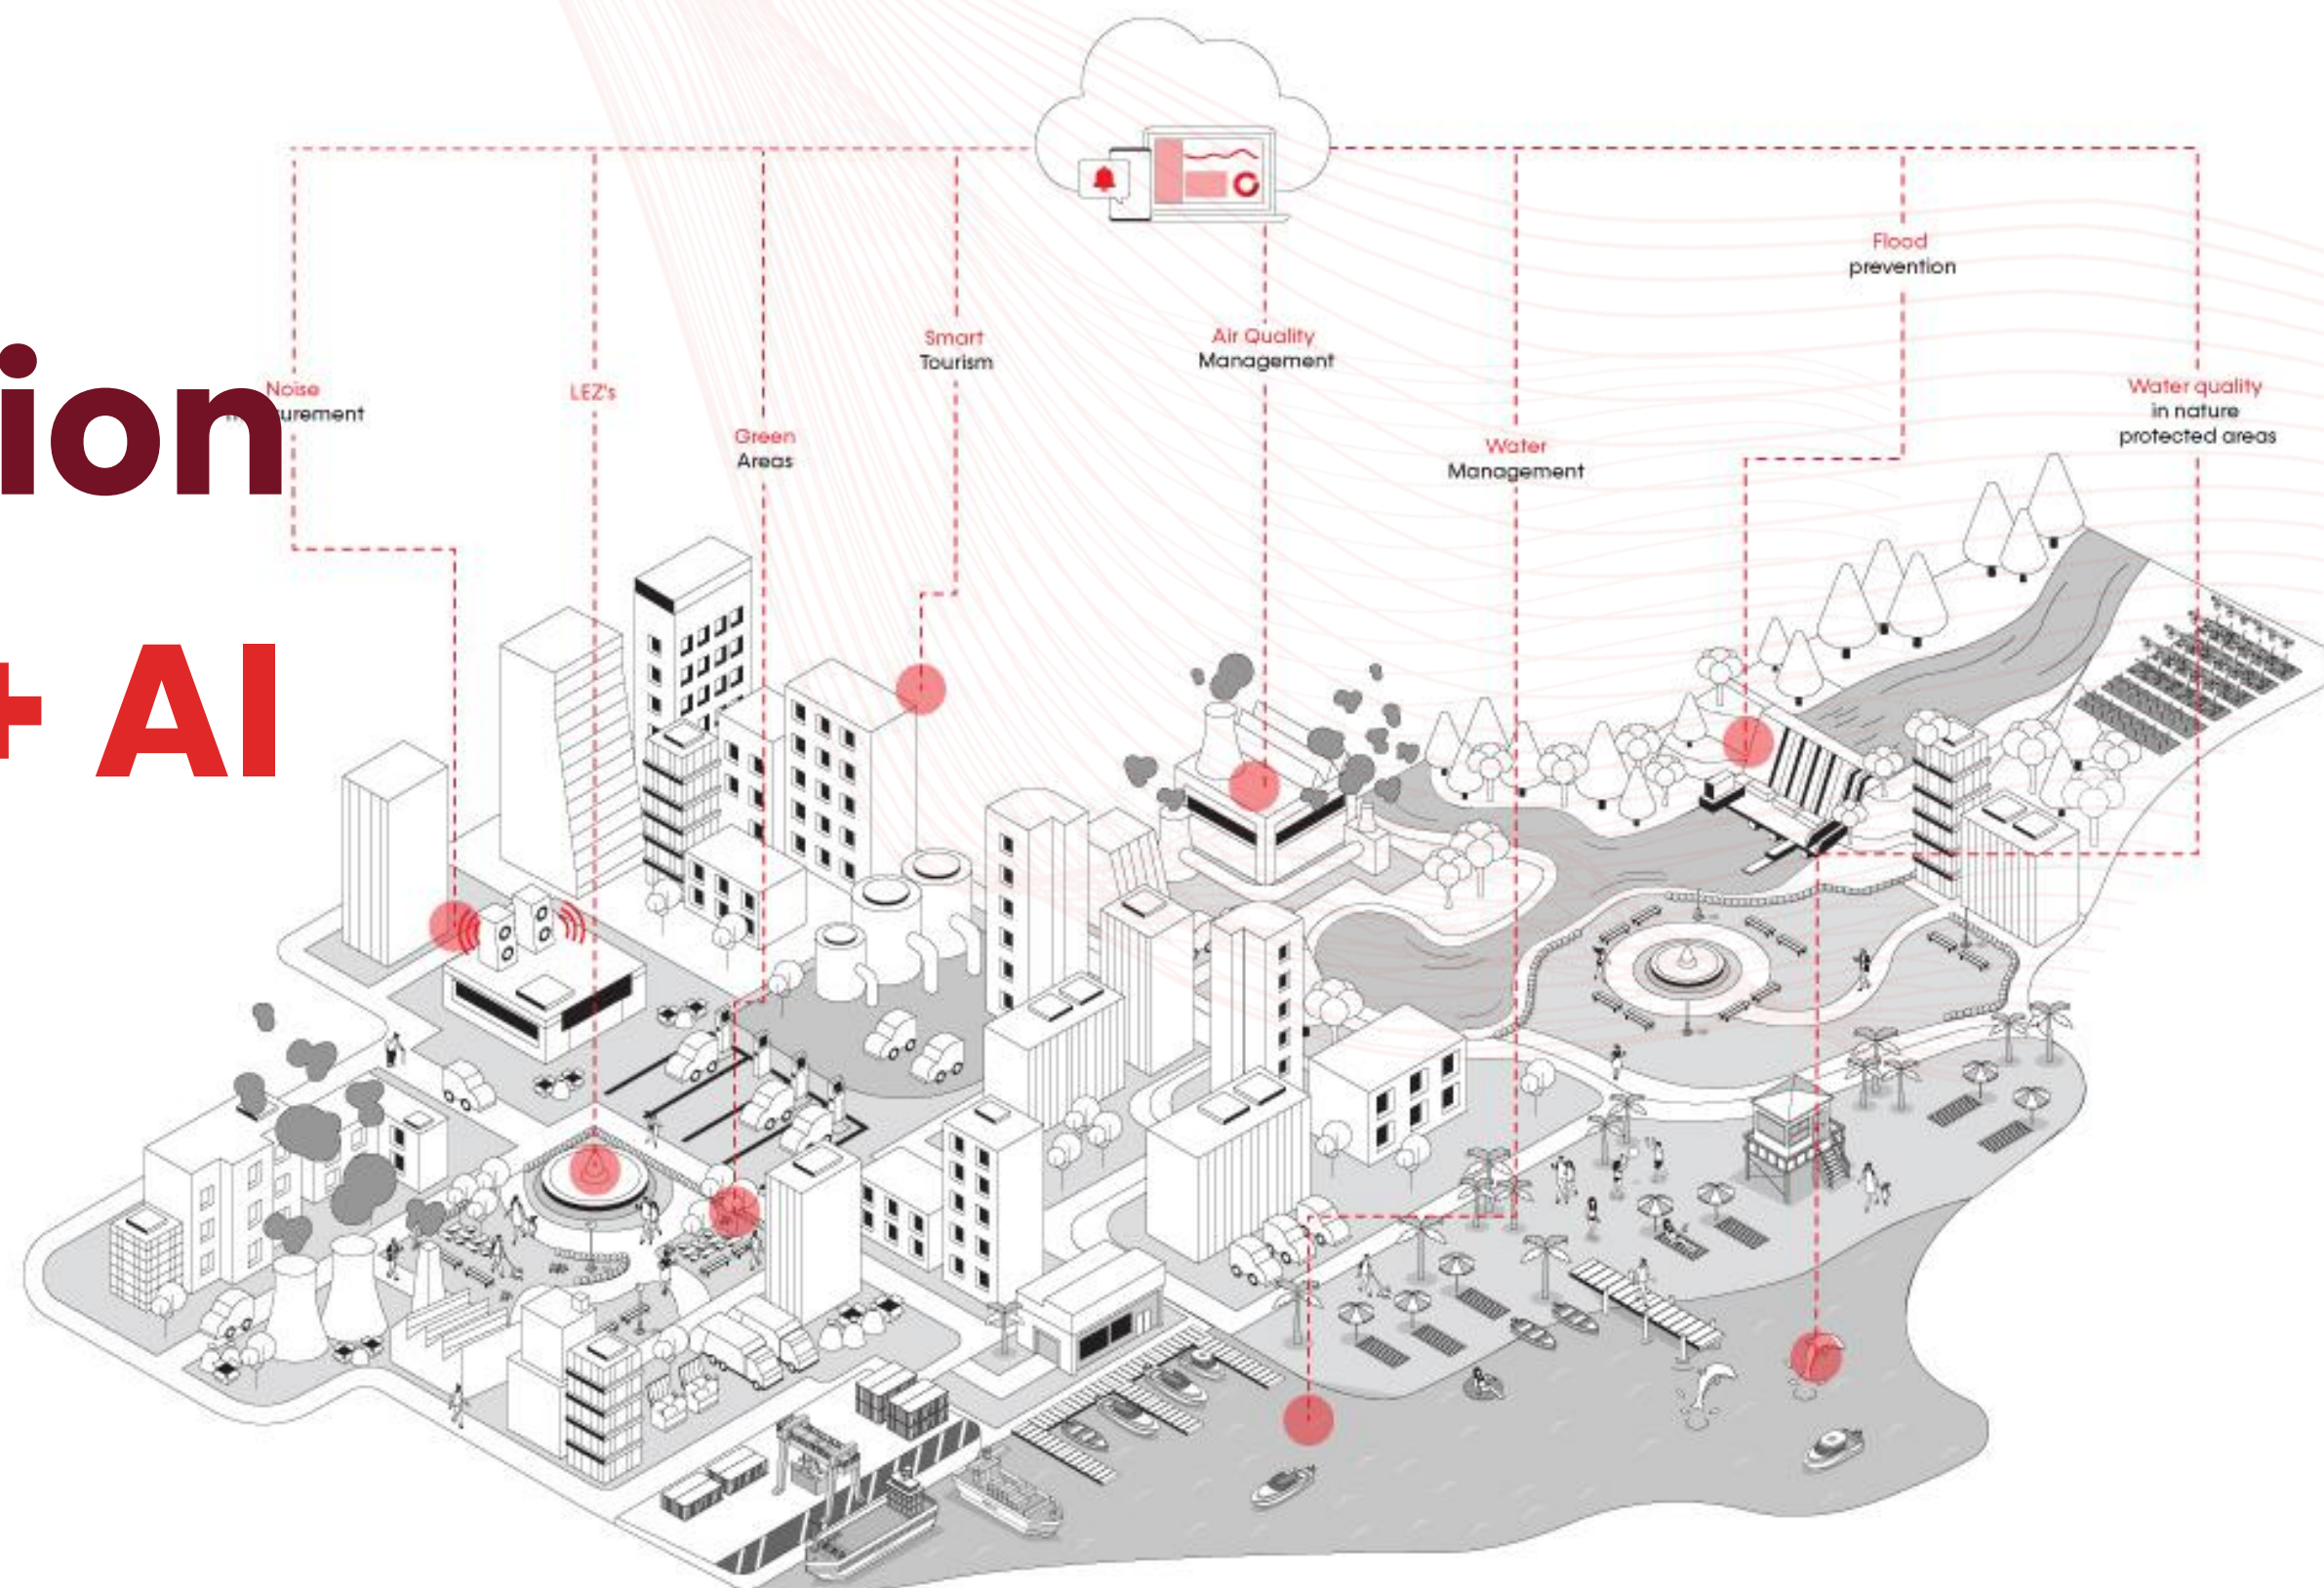

Libelium is a **technology consulting firm** with **proprietary product**, specialized in environmental and sustainability challenges.

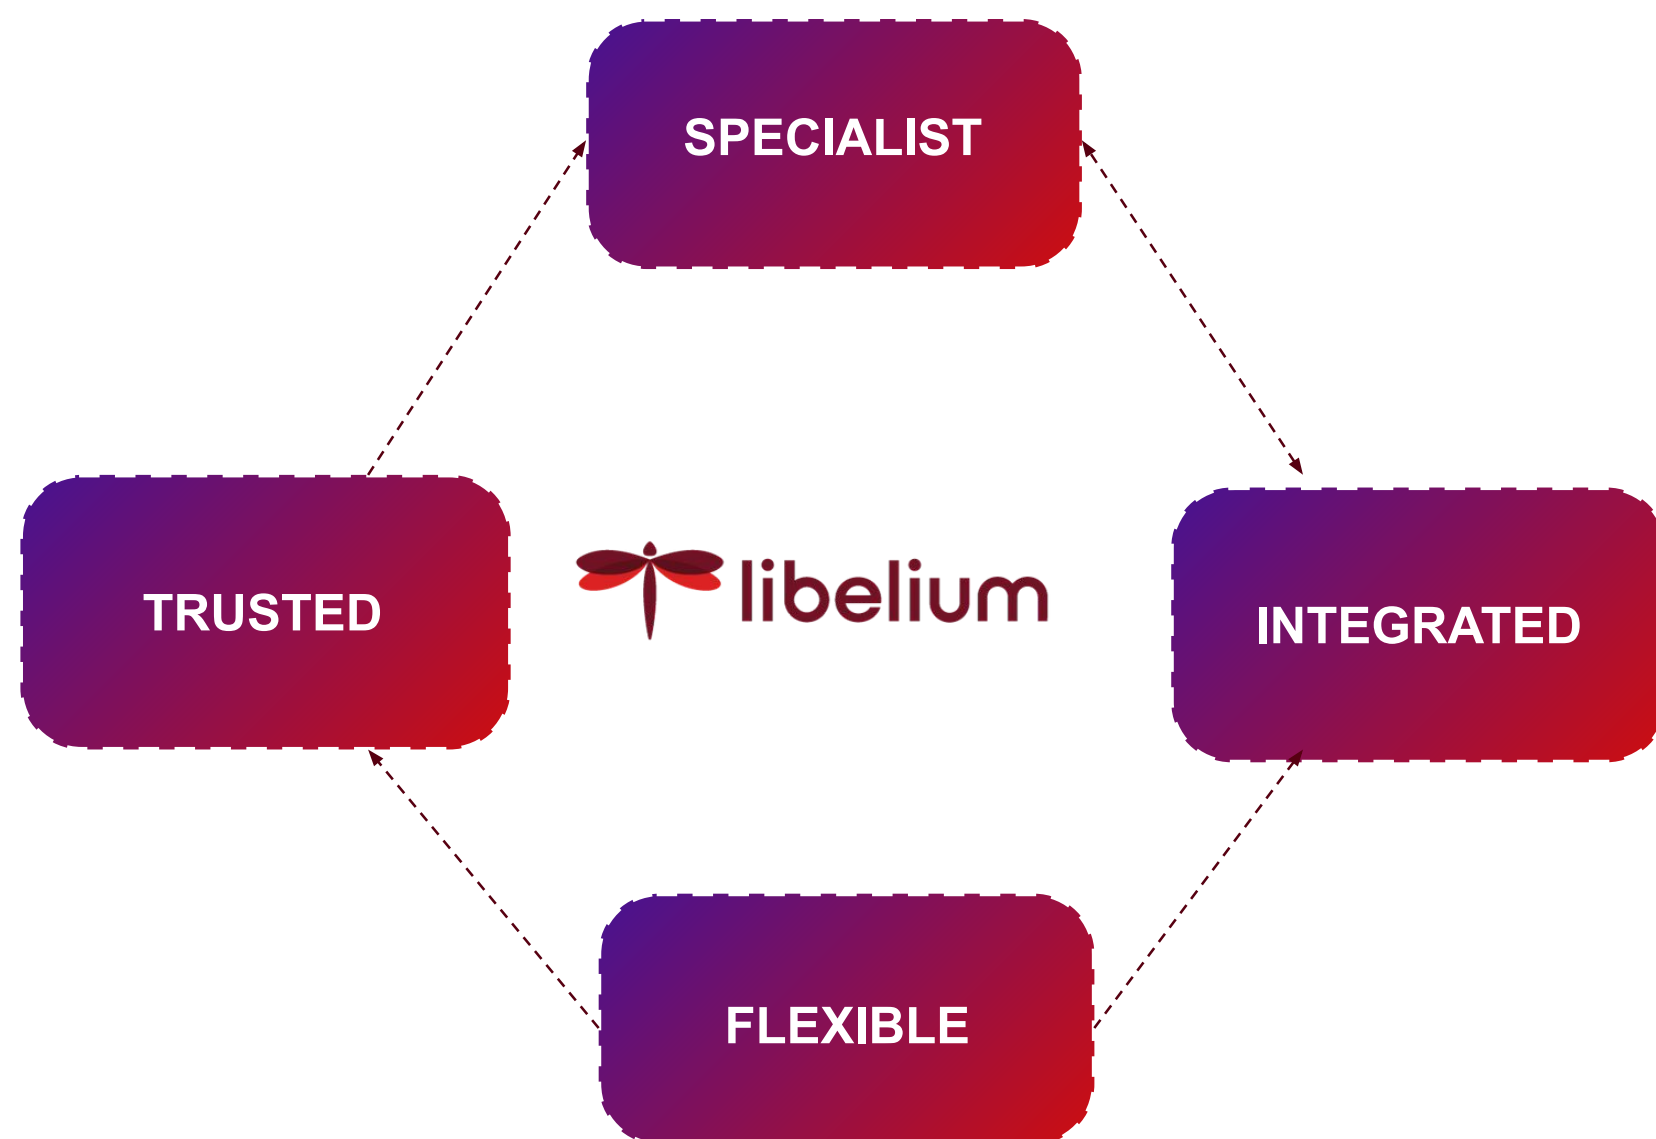

Data in action

IoT + Data + AI

We integrate **IoT, Data and Digital Twins** to turn real-world data into operational, environmental and economic impact.

Why us

- Deep Tech Specialists**
IoT, data integration and digital twin expertise with strong engineering foundations and sector-specific knowledge.
- Fully Integrated Solutions**
Hardware, data and intelligence in one interoperable ecosystem – scalable and ready for real-world deployment.
- Flexible & Modular Approach**
Open integration, adaptable architectures and technology that evolves with your needs.
- Trusted Worldwide**
20 years of track record, international certifications and global success stories across critical sectors.

Our evolution

From IoT pioneers connecting sensors to the cloud to orchestrators of data-driven decisions.

Behind the change. Beyond the challenge.

libelium.com

2006

In 2006, Libelium was founded in Zaragoza as a pioneering IoT technology company.

2011

Over the years, Libelium has launched key platforms such as Waspote, Plug & Sense!, and Meshlium.

2024

With over 18 years of experience and a presence in more than 120 countries,

2026

Today, Libelium drives smart and sustainable decision-making, helping to build smarter cities and businesses.

Impact & KPIs

20 Years building the Future. Together.

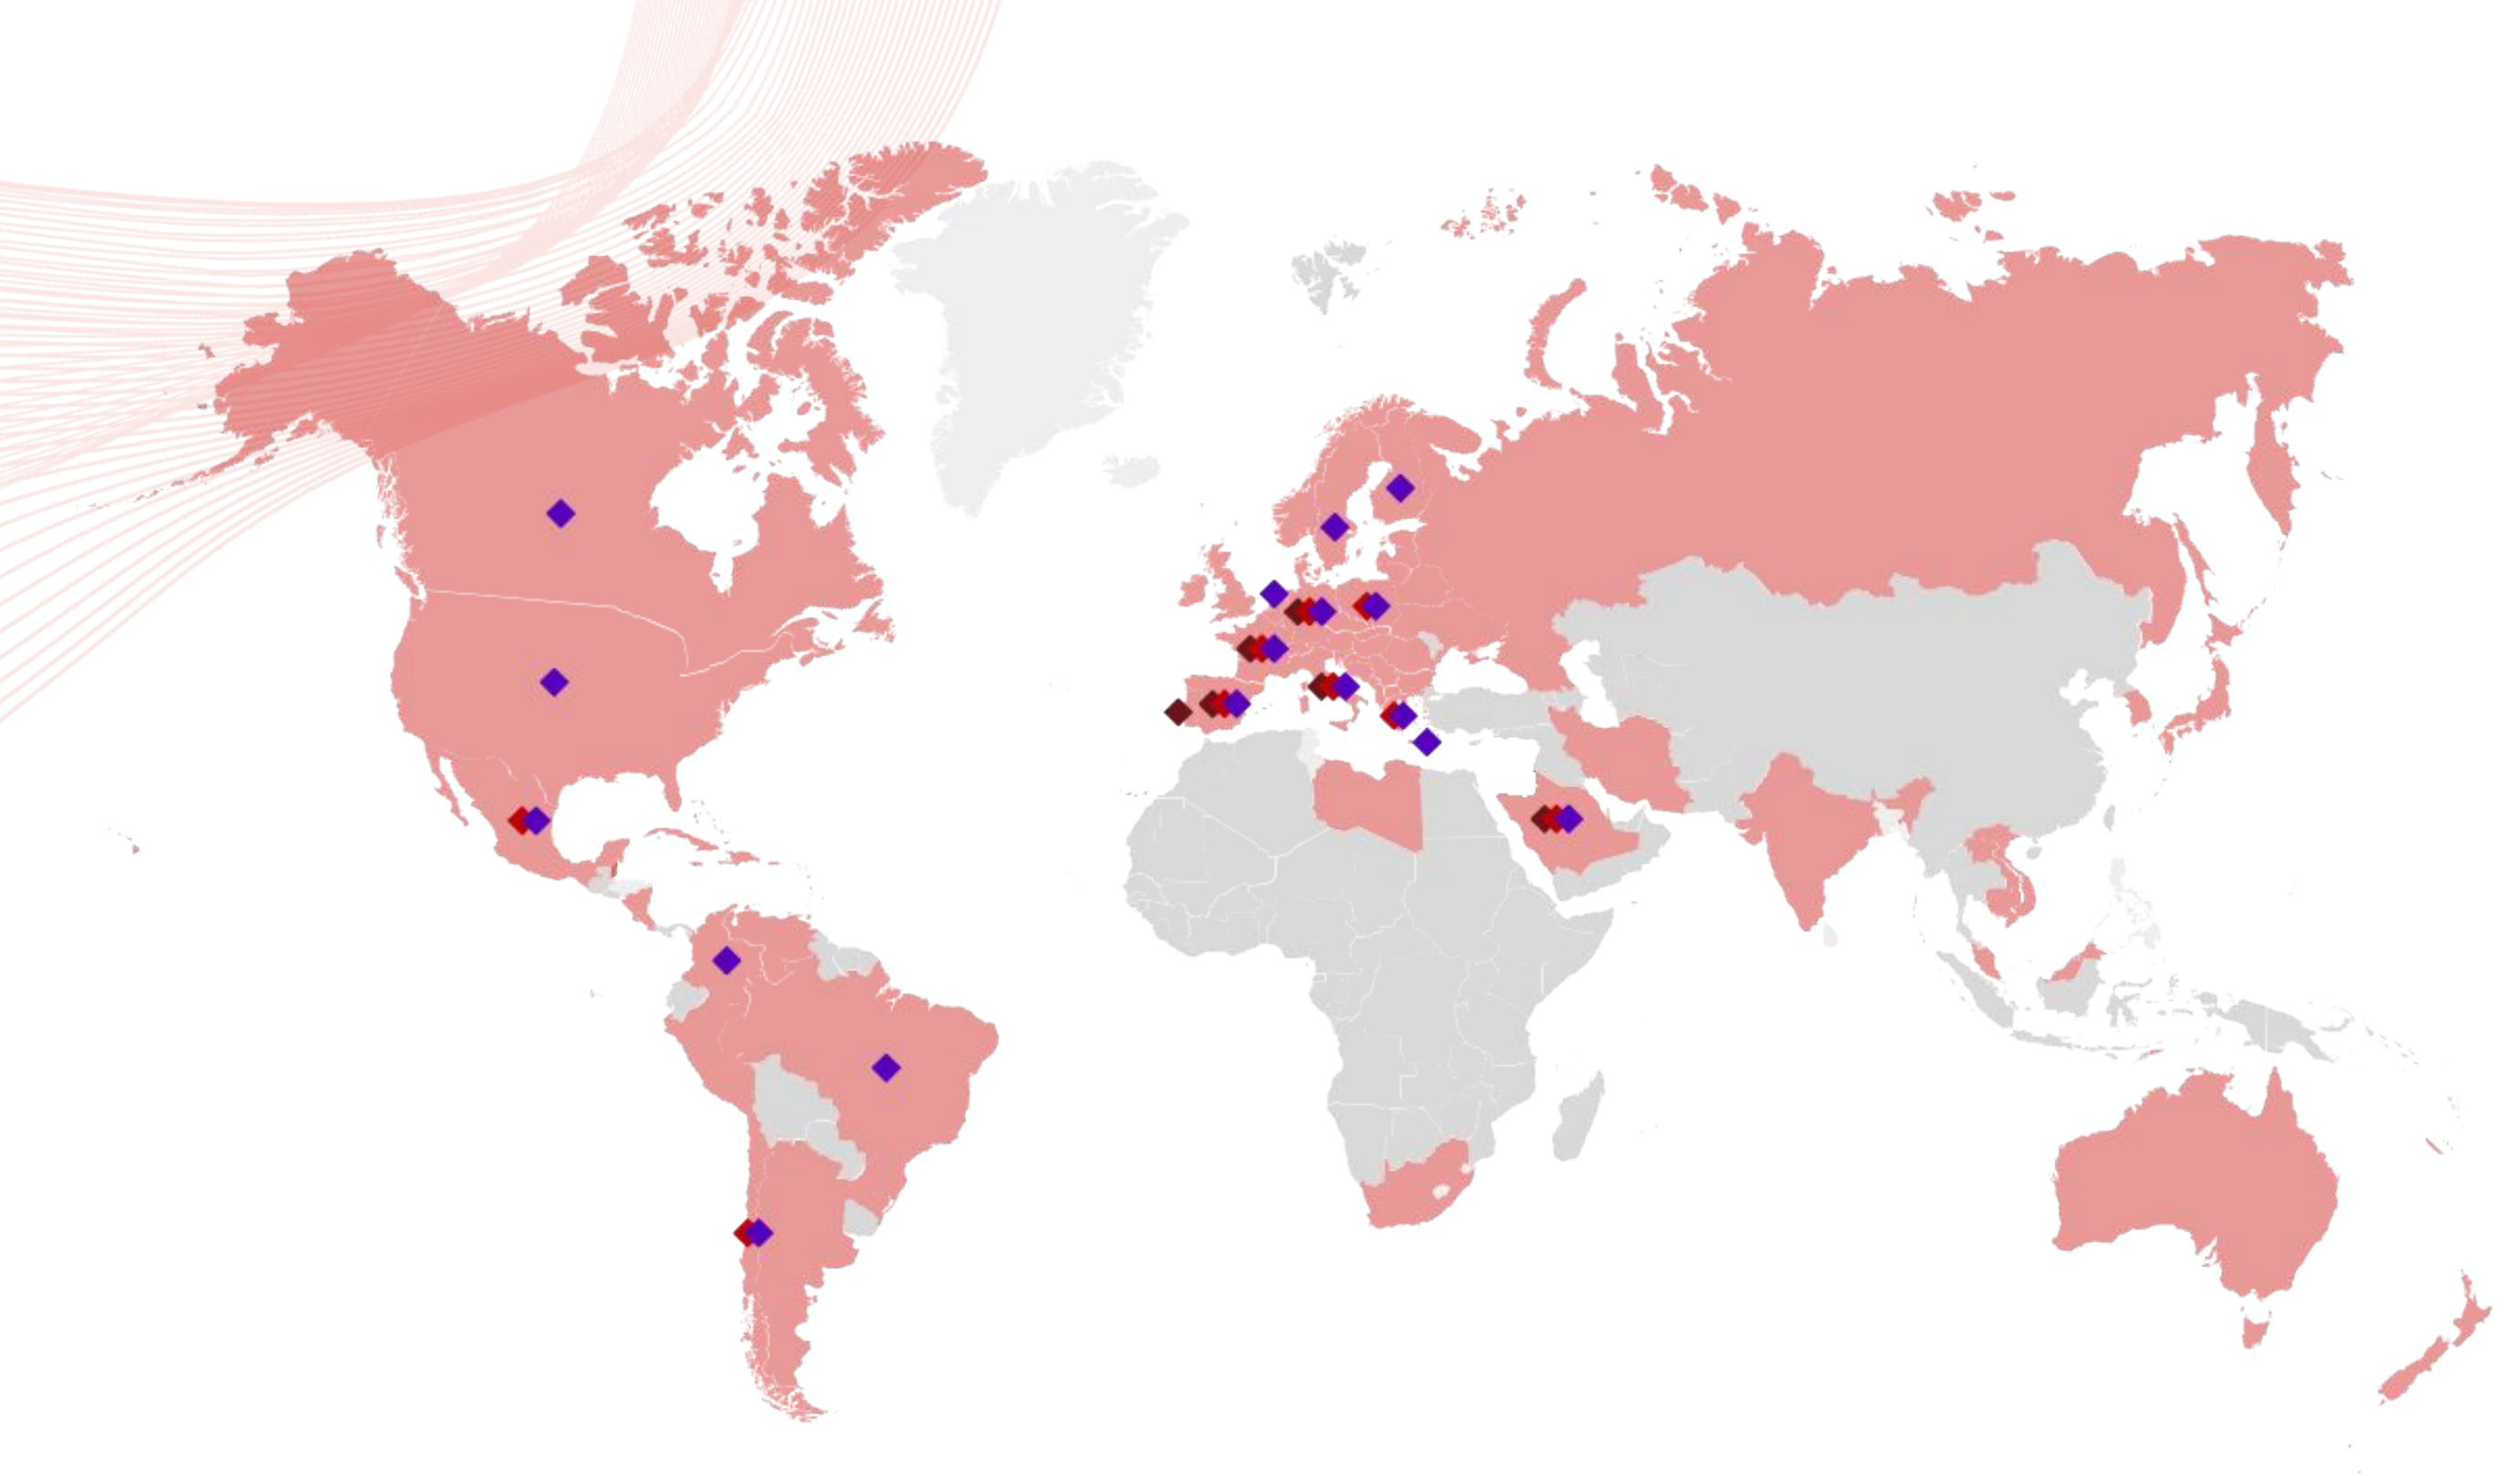

+20 Years **+150** Countries

Backlog |

Team growth |

Critical sectors

- 20+ years building smart and sustainable solutions
- Presence in 150+ countries
- Trusted by cities, industries and institutions worldwide
- Long-term commitment to R&D and product evolution

International awards in Smart Cities, IoT and sustainability
Participation in strategic European and global initiatives
Reference partner for innovation programmes and public projects

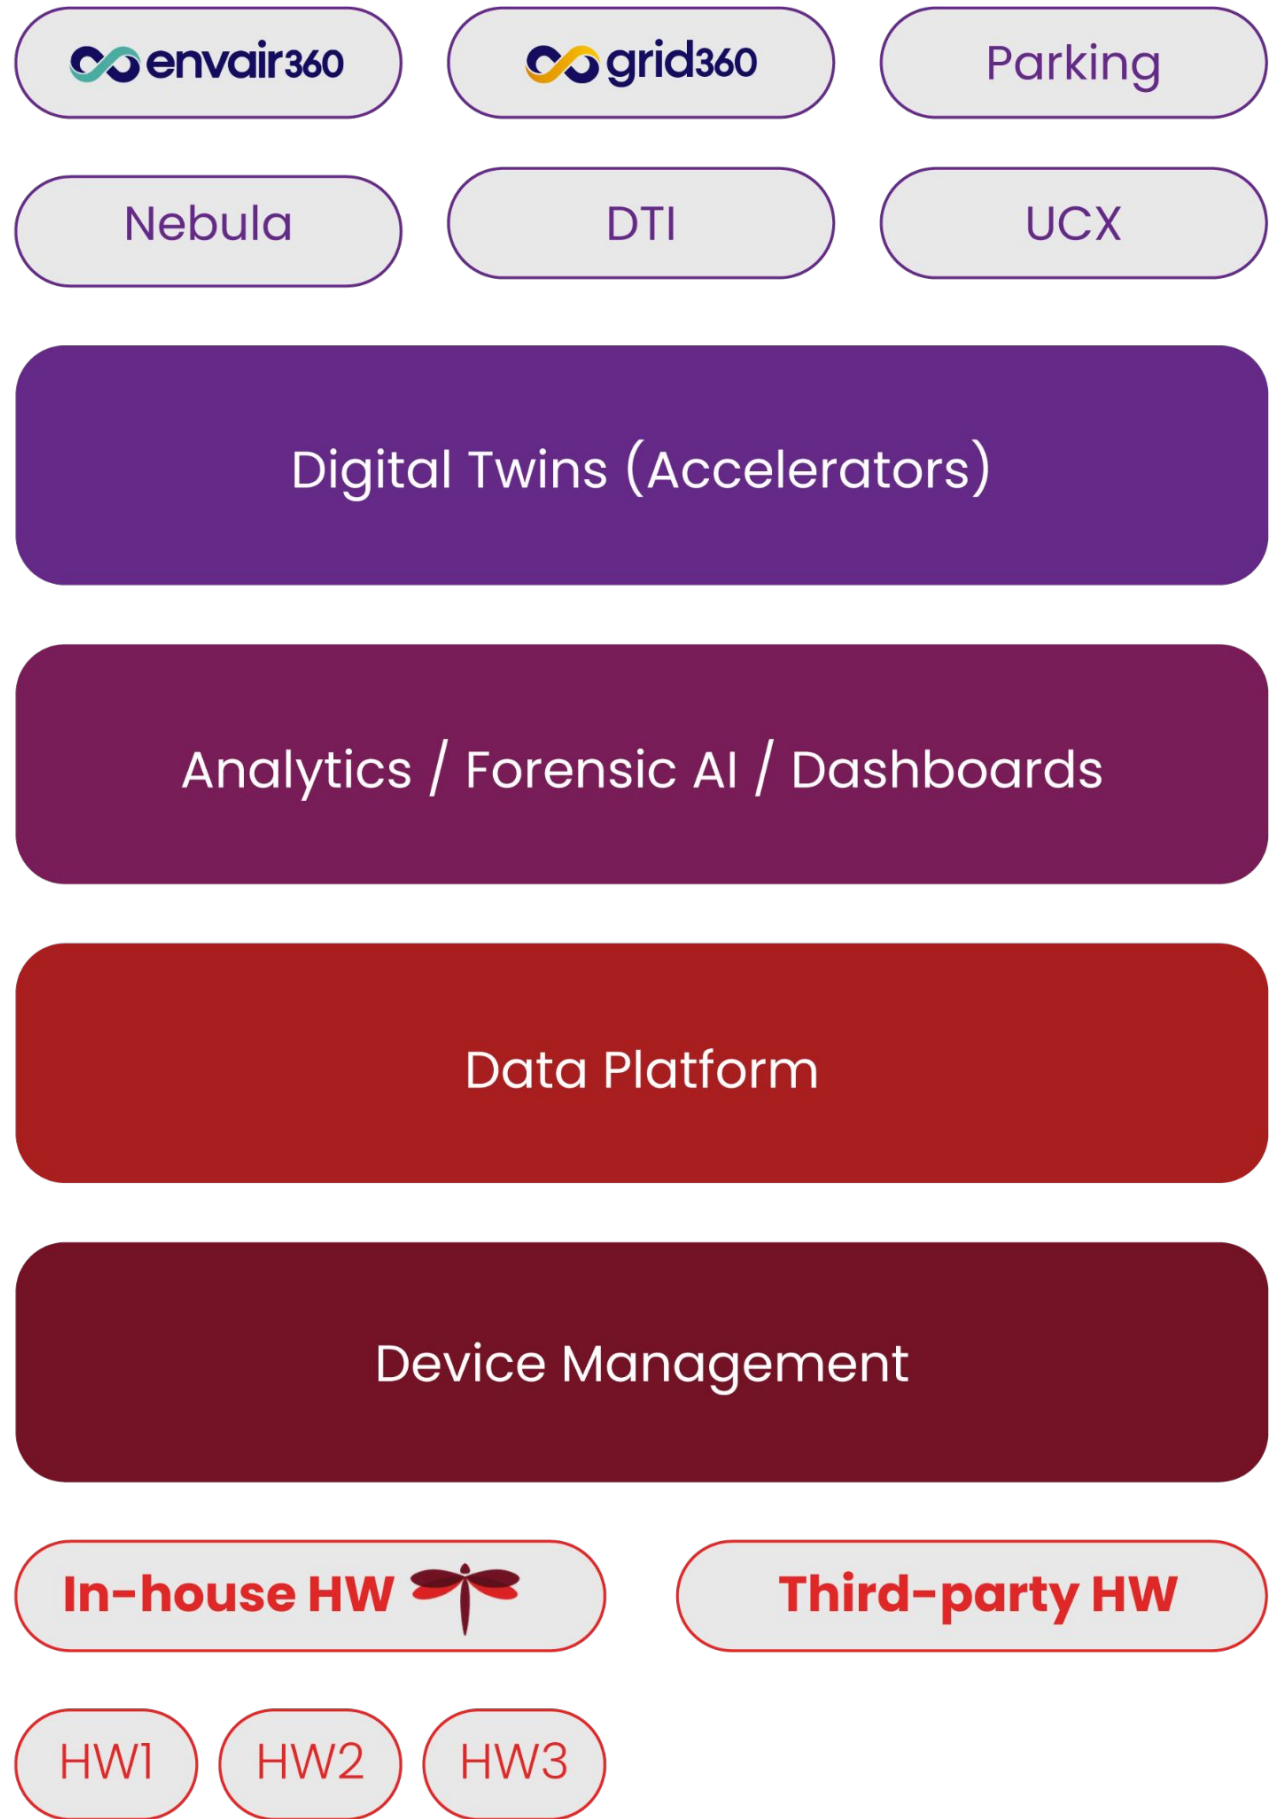

Technology consulting firm with proprietary product

We know how to **operate end-to-end** or **modular**. Our value is built on a modular, layered architecture that allows clients to start small and scale.

iris360 – Datacracy made easy

**iris360 is Libelium's proprietary
data & decision platform**

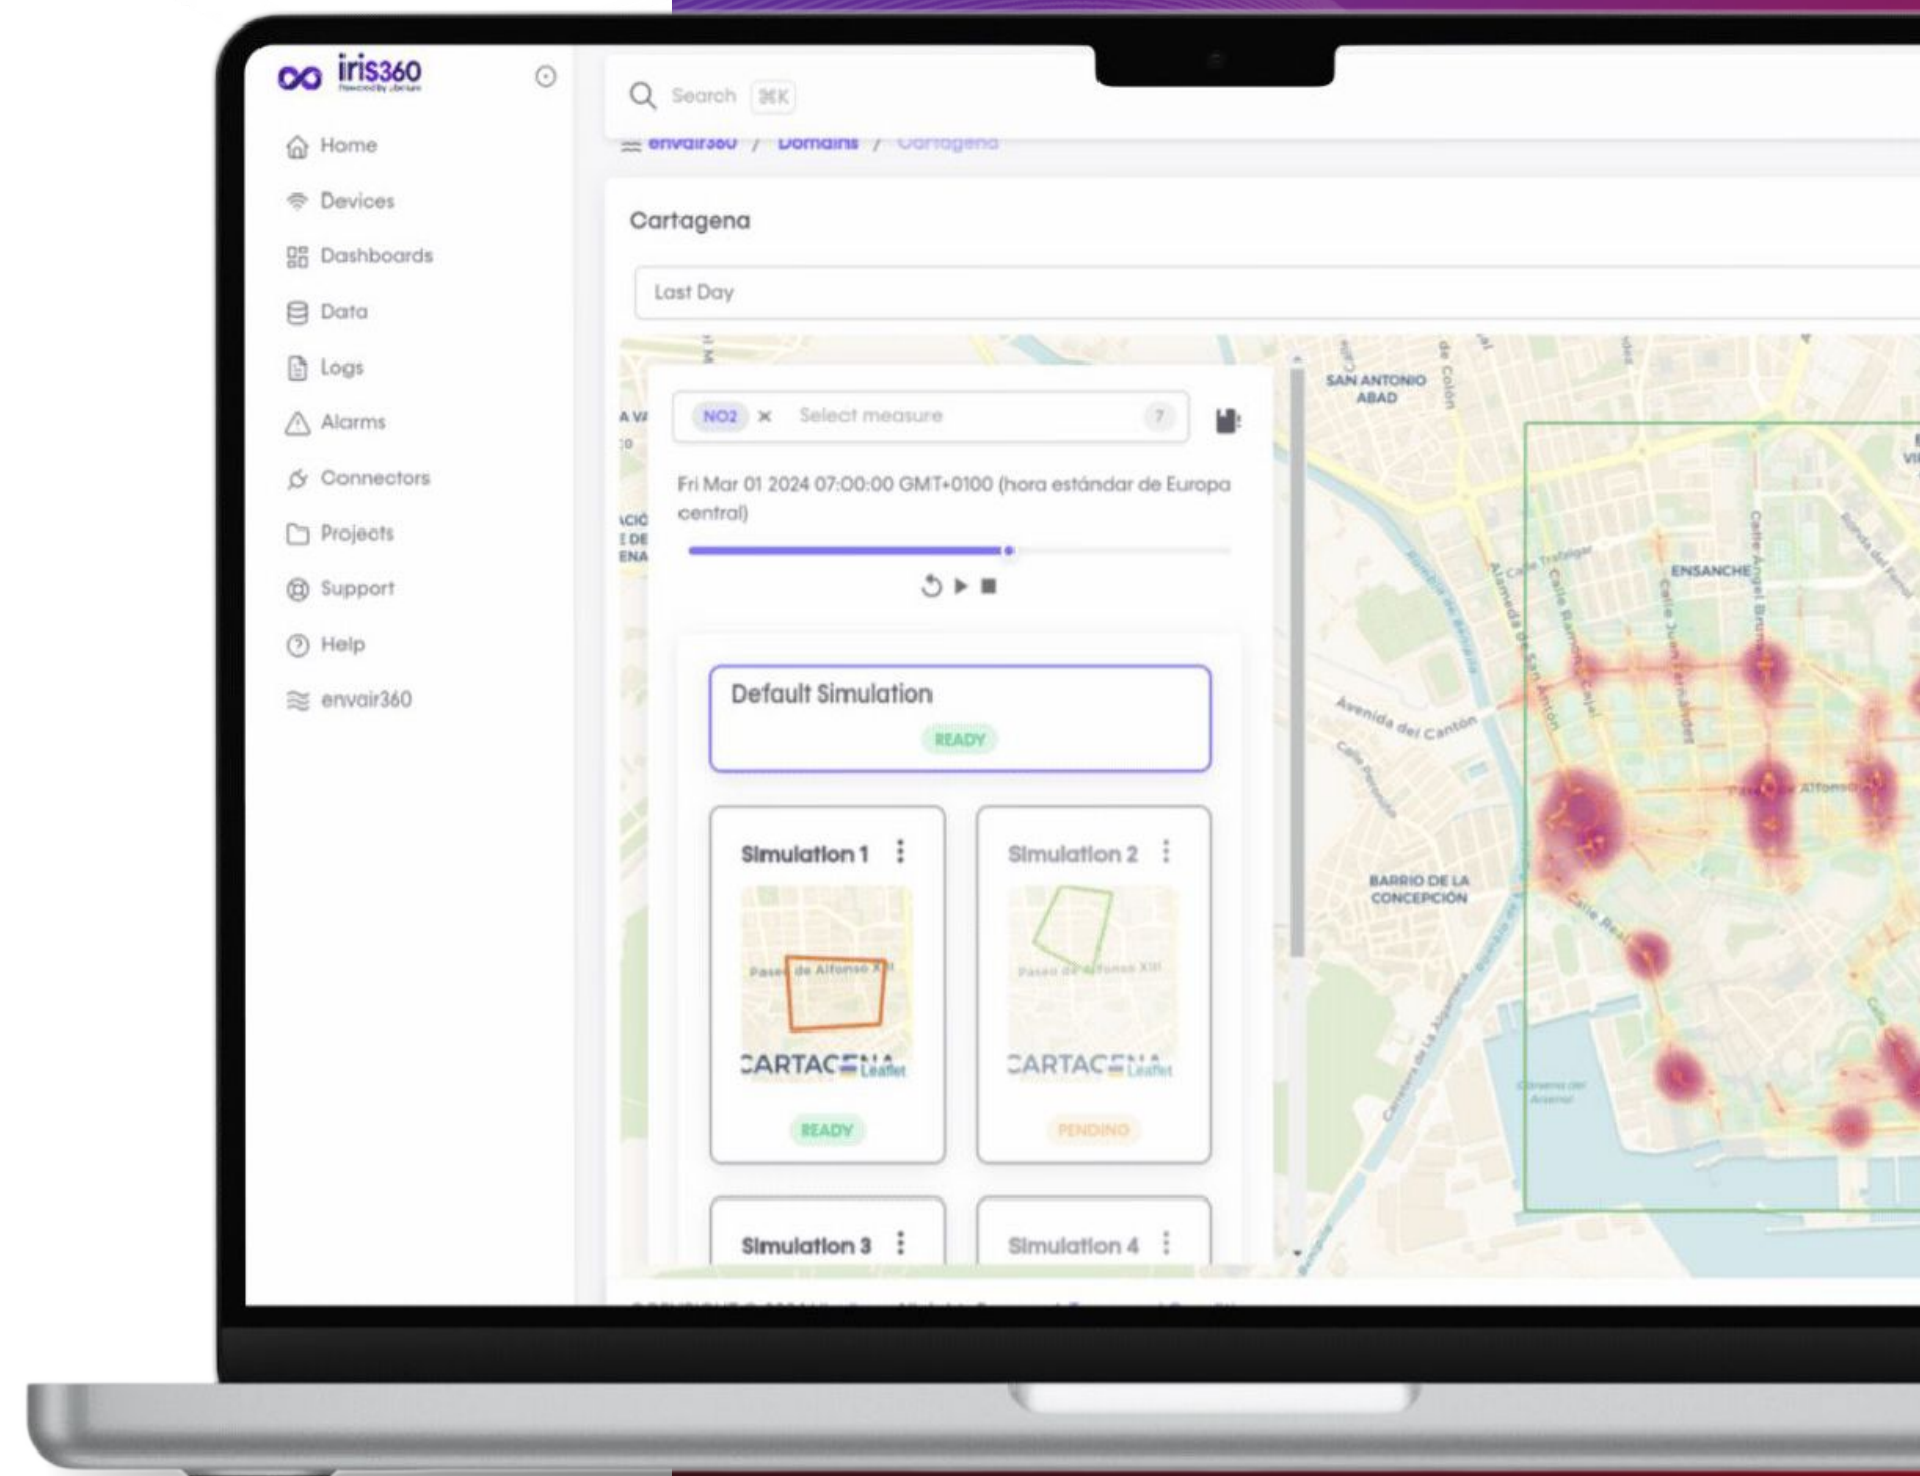

Designed to operate real-world
environmental and territorial challenges at scale.

It is the core technological asset that enables Libelium
to deliver solutions that are:

**Modular or
end-to-end**

**Scalable and
interoperable**

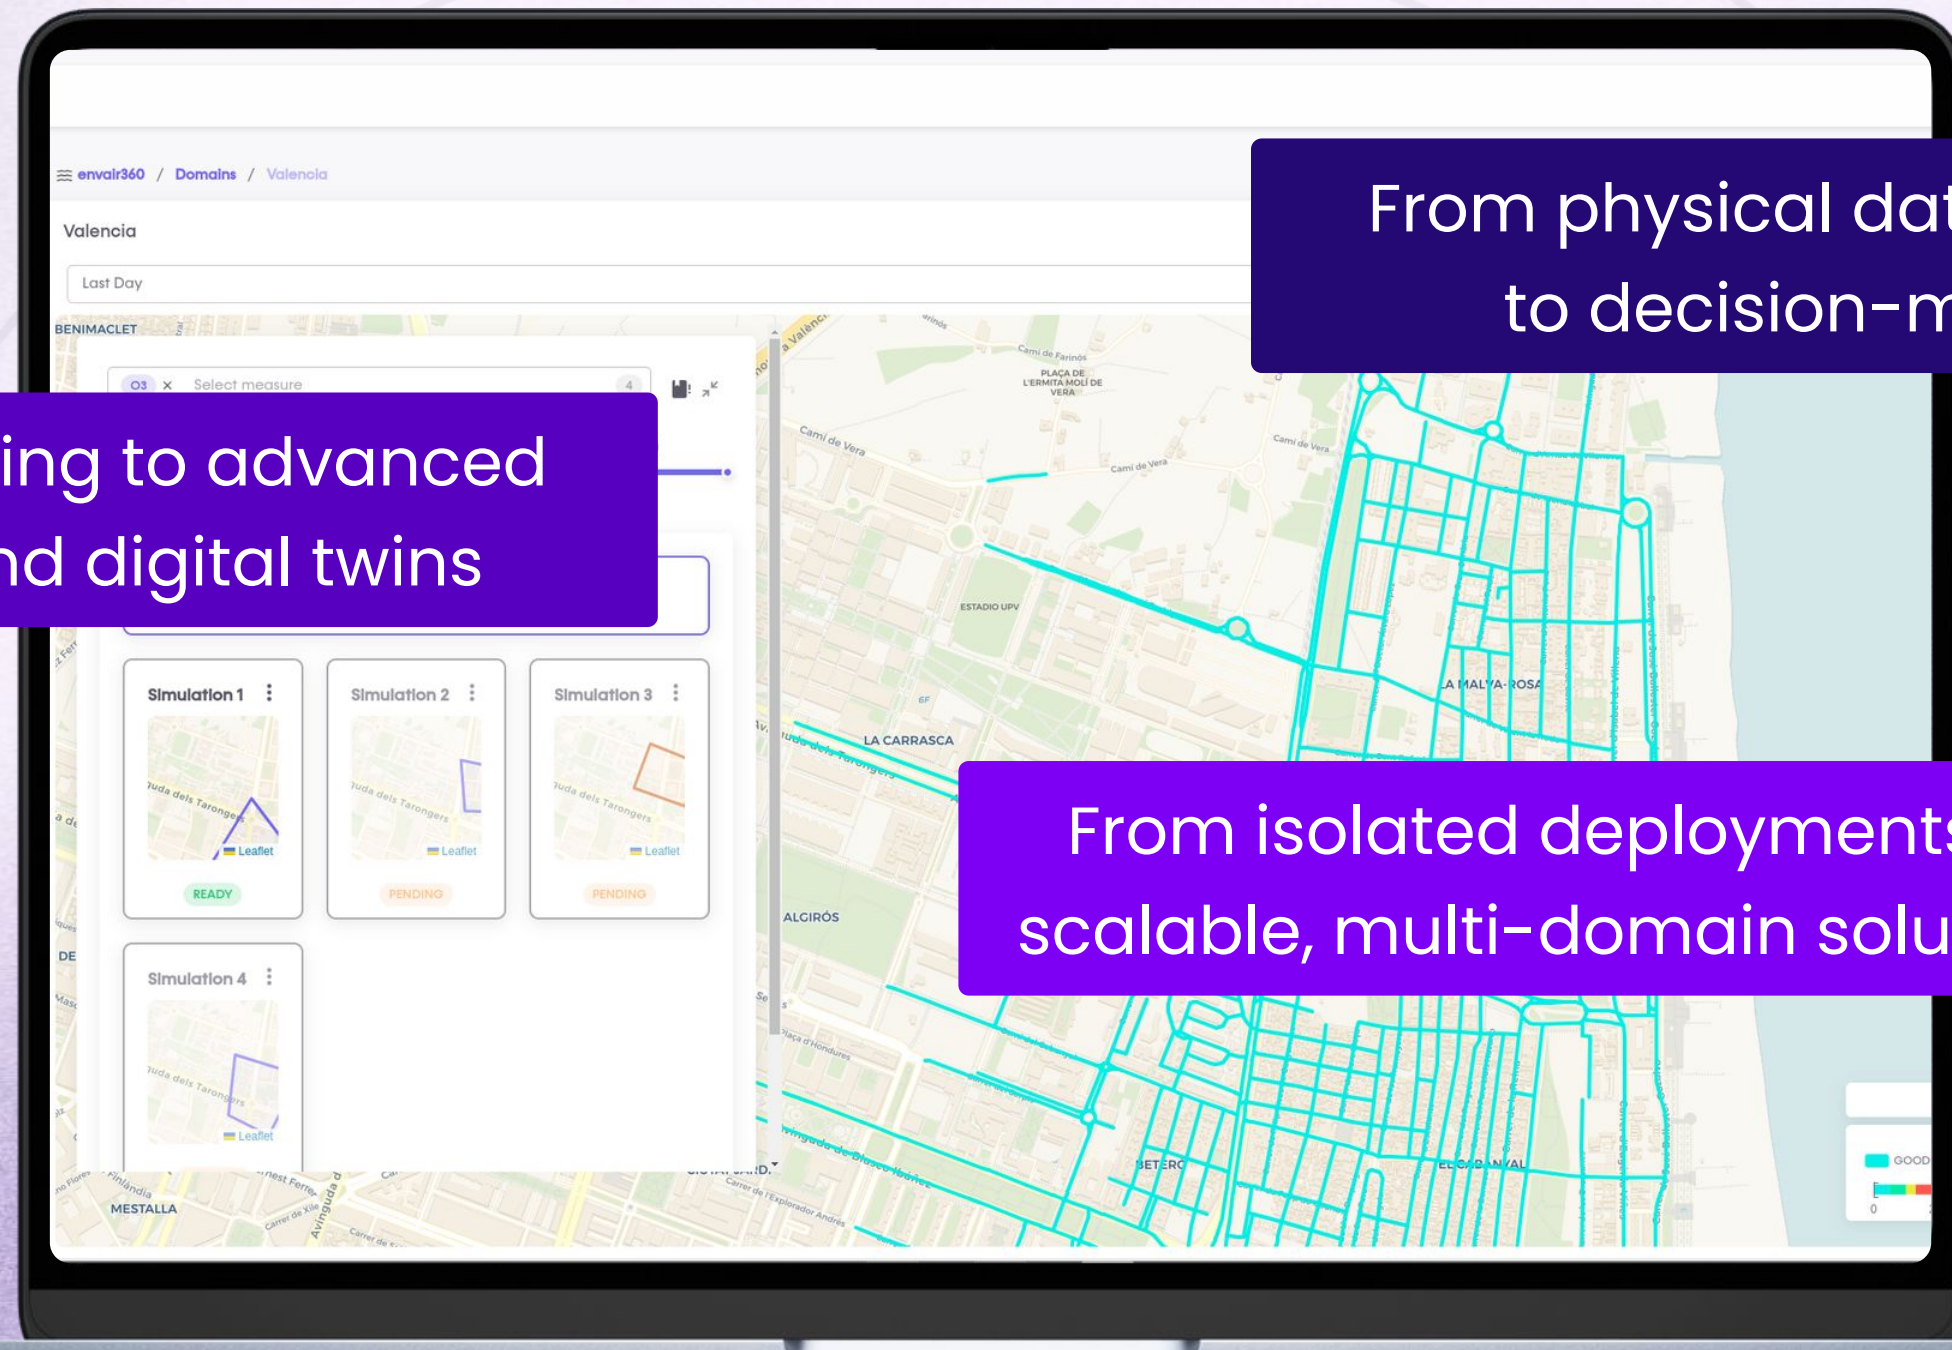

**Ready for regulated and
mission-critical
environments**

What is iris360

A single platform to manage the full data lifecycle

From physical data capture to decision-making

From monitoring to advanced analytics and digital twins

From isolated deployments to scalable, multi-domain solutions

iris360. Your Complete Data Ecosystem

- Integration of own and third-party IoT data sources
- Centralised operation of devices, data and assets
- Advanced analytics, dashboards and automated reporting
- Simulation and scenario modelling through Digital Twins
- Evolution of use cases over time, without technological lock-in
- Designed specifically for environmental, urban and industrial contexts
- Based on open standards and interoperability
- Proven in real deployments across cities, infrastructures and industries
- Continuously evolving as a product, not as a one-off project

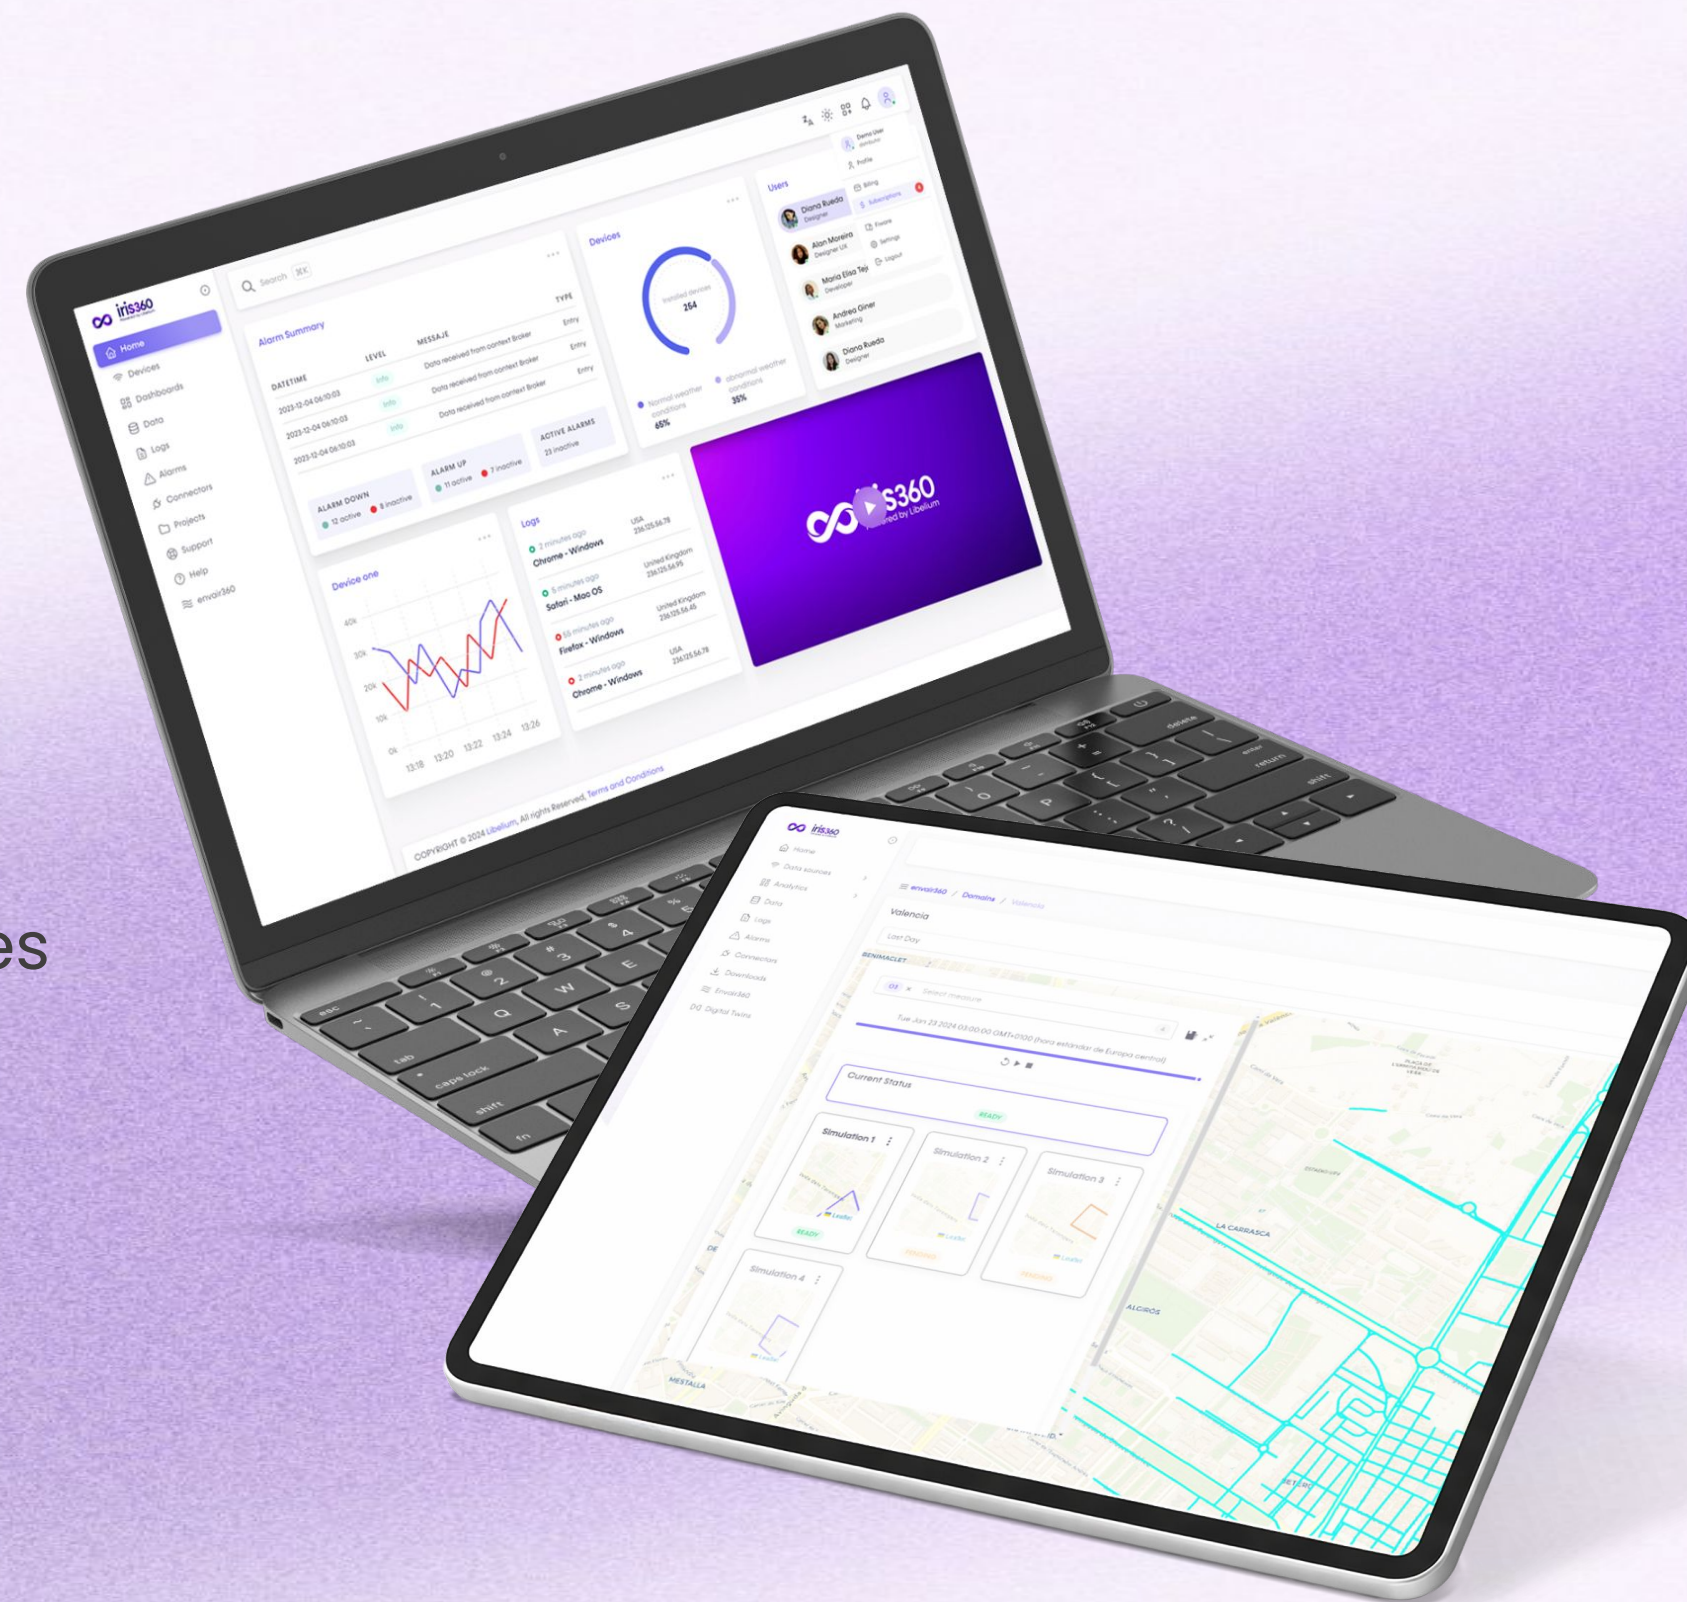

What we build on iris360

A common core for all Libelium solutions:

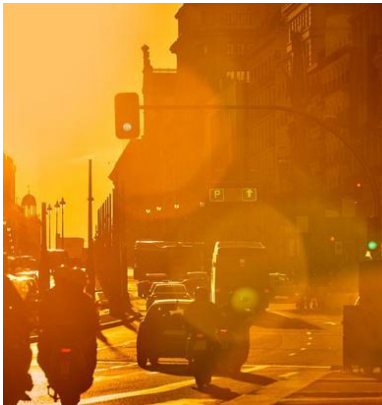

- Smart Cities & Territories
- Industrial & Infrastructure monitoring
- Tourism & Heritage management
- Environmental impact and sustainability use cases
- Digital Twins and decision-support systems

iris360 turns data into decisions, and projects into scalable solutions.

Modular and flexible

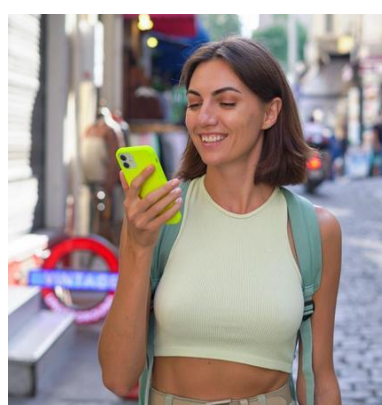

No Limits, Just data!

Urban Health:
Air & Noise monitoring

Urban Mobility
Parking, Digital Signaling

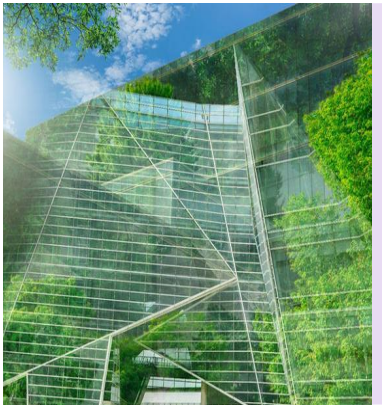

Smart Tourism

Experience

Certified technology & processes

- ENS High Level
- ISO 27001 – Information Security
- ISO 20000 – IT Service Management
- ISO 33000 – Level 5 (Process Maturity)
- Smart City standards (UNE / FIWARE / Gaia-x / ECLIPSE)
- Alignment with European data and digital frameworks

Certifications are not a badge. They are what allows us to operate in regulated, critical and public environments.
